

Philosophy

ROCKSTAR MODELS is the rockstar among the model agencies. New trends are not only served but created by the support of urban creativity – directly from the middle of Berlin and the heart of Europe.

In fashion- and lifestyle business its more and more all about transporting images in a credible way, creating emotions and underlining the character of brands. ROCKSTAR MODELS is specialised on the management of a new generation of models – their most important attributes are their character, creativity and talent. The identity of each model goes beyond the classic ideal of beauty and gives projects the deserved uniqueness and credibility.

What is a Rockstar?

A rockstar doesn't need to make music. The definition of being a rockstar goes far beyond and is transferable to many kind of people. Musicians, athletes, fashion designers, DJs, models and entire companies may be rockstars! An extraordinary creativity, tremendous energy and the will to be different is important. That's what we are and do.

Service

ROCKSTAR MODELS is based on many years of experience and offers together with partners a full service package to its clients. Models, photographers, stylists and a professional project management can be served by one hand. Detailed consultancy and customised solutions complete the service portfolio.

We address clients who are looking for something special to realise creative and professional projects. Our models are booked mainly for photo shootings, music videos, fashion shows, promotions, ads, TV and movie productions and for the „spice-up“ of events.
